

Curious to know more about how BMB could optimize your ER Billing?

BMB has the capacity to provide both Professional and Facility ER billing.

The BMB Difference

- We communicate directly and frequently with your front desk. This means we address issues before they become trends.
- We communicate with patients in advance to help them understand their EOBs as well as their patient responsibility so they're not surprised by their bill. This means better reviews for your social media.
- We submit data directly to the State so you don't have to.
- We'll provide everything you need for reporting to your investors. Our best in-class reporting helps you manage your business and plan ahead.

"With Blitz handling our billing, collections increased almost immediately. We hadn't realized just how much money our previous billing company was leaving on the table. Their reporting allows us to factor for each of our locations much more precisely than we ever did before."
John S., Healthcare Consultant

"I think one thing that makes us different at Blitz is how we each work an Account instead of a Department. At other billing Companies where I've worked they have different departments for Claims, Appeals, or AR and a lot can get lost in the shuffle. At BMB, I'm working a claim from the moment it comes in until I'm satisfied that we got it paid at the best possible rate for our client." Krystal V., ER Billing Specialist

3550 Parkwood Blvd, Frisco, TX 75034
