

Curious to know more about how BMB could optimize your Lab Billing?

Changes in regulations have made Lab billing especially challenging this year so our Lab team has worked hard to stay on top of the latest regulatory changes.

The BMB Difference:

- Diligent focus to ensure correct coding and modifiers on every claim
- A/R Follow Up to confirm claims are landing with the payers and being paid according to the latest regulatory guidelines
- Ongoing research to keep us up to date with the continual changes in laboratory medical billing guidelines
- Able to meet the unique billing requirements of specific services and flexible to work with any EMR

3550 Parkwood Blvd, Frisco, TX 75034

“Successfully billing Lab, especially in the current environment, comes down to slowing down long enough to get the claim right. Our goal is to reduce payment delays by eliminating denials and underpayments due to coding or documentation errors.”

Melissa T., Billing Consultant

“I’ve seen a lot of billing companies at work throughout the years of my career, but I’ve never come across any as responsive and effective as Blitz. What has impressed me the most is how hard they work to stay up to date on all the latest regulatory changes to optimize collections for every client.”

Sherry L., Compliance Officer
